To Whom It May Concern:

We at Emacx Systems, Inc. are in the business of helping organizations make the most efficient use of their energy resources. Efficiency is important to us. That is why we have been very pleased with the help of Ken Toumey from Schooley Mitchell in helping us make the most efficient use of our communications resources and spending.

Ken and the Schooley Mitchell team did just what they promised. They conducted a free, unbiased, independent and objective analysis of our voice and data communications. The result was that they identified ways for us to cut our expenses. The implementation of changes to our incumbent carrier account has been done by Schooley Mitchell and we are enjoying the benefits.

Ken also has helped us find alternative ways to improve our communications, even though those will not result in savings. Ken has offered options and advice and has made the process easier. His consulting advice has helped us.

We can recommend the work of Ken Toumey and Schooley Mitchell without hesitation. This is an area of expense where there are ways to save, but we did not have the time or resources to figure it out. Have Schooley Mitchell do a review for you. It may well be worth it.

Kind regards,
