To Whom It May Concern:

*Jay Adam (1942-2009)*

I am pleased to recommend the services of Ken Toumey of Schooley Mitchell.

Communications with clients and employees is of paramount importance to us. Ken and his team have helped us cut our communications costs with our cell/smart phone devices while maximizing our service. Our savings have exceeded 30% due to the detailed analysis and recommendations made. He also provides ongoing monitoring of our usage to ensure we reduce costs consistently.

In fact, Ken helped us reduce and monitor cell phone expenses with two carriers: first with ATT and then with Verizon. We made the transition from ATT to Verizon due to our desire to change carriers. The transition was lead by the Schooley Mitchell team and we had to do very little. He provided us with information on all the available devices, delivered them to our office, and activated each device for us, not leaving until all things were set.

Ken and the Schooley Mitchell team can review various types of communications expenses. Schooley Mitchell is independent and objective. There is no risk to the analysis and the opportunity for savings was realized. We would not have had the time, expertise, or resources to find these savings for ourselves.

I highly recommend the services of Ken Toumey from Schooley Mitchell. It has been all positive for us.

Sincerely,

**SESI CONSULTING ENGINEERS**
